

PRECISION & PERFORMANCE FOR YOUR ENGINE – OUR CAMSHAFTS

Manufactured with high precision for maximum efficiency, durability and engine performance

YOUR BENEFITS AT A GLANCE:

- Highest manufacturing precision
- Optimised valve timing
- High wear and fatigue resistance
- Customised cam profiles according to customer requirements
- Maximum length – 5000 mm, maximum diameter – 500 mm

More power through tracking

Our camshafts stand for uncompromising quality and state-of-the-art manufacturing technology. Through precise machining, high-quality materials and controlled heat treatment processes, we ensure optimal valve movement, improved engine performance and a long service life.

Whether for series production or custom-made products, our camshafts meet the highest requirements in terms of reliability, efficiency and performance.

**TOGETHER, WE WILL REALISE YOUR
VISION – WITH THE UTMOST PRECISION &
UNCOMPROMISING QUALITY.**

Our machinery

- WFL MILLTURN M-120, M-65
- CNC-camshaft grinding machines
- CNC turning and milling centres
- Precision grinding machines
- Heat treatment and hardening processes
- State-of-the-art measuring and testing technology

Why Erhard Fröhlich?

**Proven engineering and
manufacturing expertise**

**Designed in accordance with
international standards**

**Committed to precision,
durability and reliability**
